

Product# F0554SP - Primilac™, Liquid Infant Primate Diet, Shake and Pour, 1 kg/Bag

Directions for Preparing One 6-ounce Serving

1. Measure 200 mL of warm tap water and add to lidded container.
2. Add 1 scoop (31.25 grams) of Product# F0554SP .
3. Shake approximately 1 minute or until dissolved.
4. Product ready to dispense into feeding tubes or bottles.

Feeding Instructions

The prepared diet should be maintained under refrigeration and should be dispensed within 3 days. The prepared diet should not be kept longer than 48 hours at room temperature to prevent diet deterioration.

If diet has been prepared the previous day, invert bottle several times prior to dispensing to re-suspend particles, which may have settled.
