What is PrimiOtic™ Plus?
PrimiOtic Plus is a live non-human origin probiotic that combines the benefits of *Lactobacillus reuteri* and *Saccharomyces boulardii*.

Why is PrimiOtic Plus Unique?
Unlike traditional probiotics, the *L. reuteri* in PrimiOtic Plus has been harvested and cultured from the gut of a non-human primate. This strain specificity allows the *L. reuteri* to colonize the intestinal tract of the non-human primate. Additionally, PrimiOtic Plus combines the benefits of both a bacterial and yeast probiotic in a stable easy-to-dose powder.

Why is Lactobacillus reuteri beneficial?
*Lactobacillus reuteri* is a natural inhabitant of a healthy GI. *L. reuteri* secretes reuterin, which has antimicrobial properties against pathogenic bacteria, such as Salmonella, while keeping the normal gut microflora intact. *L. reuteri* also modulates and enhances the immune system.

Why is Saccharomyces boulardii beneficial?
*Saccharomyces boulardii* attaches to pathogens such as Clostridial bacteria eliminating them and neutralizing toxins.

How does PrimiOtic Plus work?
Primate intestinal microflora is easily imbalanced by stress, medications, disease, dietary changes, and research protocols. PrimiOtic Plus can help support and normalize the gastrointestinal flora to maintain a healthy balanced gut and improve digestion.

What does each scoop (4 grams) contain?
PrimiOtic Plus contains 2 billion CFU of live *Lactobacillus reuteri* and 2 billion CFU of live *Saccharomyces boulardii* in an easy-to-dose powder. Simply top dress biscuits or mix with semisoft food ingredients. By providing a source of live probiotics, PrimiOtic Plus provides natural fortification of the gastrointestinal tract.

Product# PB150-50  Primiotic™ Plus, Primate Probiotic, Powder, 50 Doses/Jar

**Feeding Directions:** Scoop equals 4 grams
- <1 kg primate ¼ scoop daily
- 1-2 kg primate ½ scoop daily
- 3-10 kg primate 1 scoop daily
- >10 kg primate 2 scoops daily

**Note:** If non-human primate is on antibiotic therapy, administer PrimiOtic Plus 4-6 hours after antibiotic dosage.

**Recommended Storage:** Refrigerated
PrimiOtic Plus contains live culture, which is sensitive to heat and moisture.

**Shelf-life:** 12 months from date of manufacture

**Ingredients:** Yeast Extract, Yeast Culture, Dextrose, Active Dried Yeast (Dried Saccharomyces cerevisiae Fermentation Product), Dried Lactobacillus reuteri Fermentation Product, Sodium Aluminosilicate
